WORK EXPERIENCE

Technical Project Manager
UGL Dispatch
OCT 2025 - Present

- Spearheaded cross-functional teams to build custom fleet tracking automation using Samsara API integrations and Telegram bots. Managed corporate web architecture while aligning software development lifecycles with strategic operational goals to ensure highly efficient project delivery.

Technical Project Manager
Microsoft
NOV 2025 - JUN 2026

- Directed a targeted 6-month regional initiative, overseeing the execution and alignment of high-level technical projects across Jordan. Managed stakeholder communications, resource allocation, and risk mitigation to ensure seamless delivery of strategic project milestones.

Technical Quality Control Manager
Black Oasis
AUG 2024 - AUG 2025

- Led technical quality assurance protocols and compliance initiatives to maintain rigorous software performance standards. Streamlined technical workflows and enforced best practices across development cycles, significantly elevating product reliability and operational efficiency.
